TECHNICAL SKILLS

Mobile/Frontend: Dart, Flutter, BLoC State Management, Dio, Sqflite
Backend: Golang, Gin, GORM, JWT, REST API
Databases & BaaS: MySQL, Supabase, Firebase
Tools and Workflows: Git, Github, Application Deployment, Trello, Slack

WORK EXPERIENCE

LIFESAVER MEDICORDS INC. Cubao, Quezon City
Flutter Mobile Developer Mar 2025 – Present
Technologies: Dart, Flutter, Go, MySQL, Trello, Slack

- Architected and shipped two flagship cross-platform healthcare applications (Lifesaver for Family and Doctors) to the App Store and Play Store, successfully delivering critical medical tools to end-users
- Spearheaded the development of a real-time telemedicine consultation feature using WebRTC and WebSockets, delivering seamless, low-latency video and audio communication between doctors and patients
- Engineered secure in-app purchases and tiered subscription models, establishing reliable monetization pipelines and enabling direct recurring revenue
- Designed a highly capable codebase utilizing Clean Architecture, BLoC for state management, and Dio for REST API Integration, significantly improving app maintainability and data synchronization speed
- Enhanced system efficiency by overhaul of BLoC logic and optimizing asynchronous request handling, resulting in a 20% improvement in rendering fluidness and overall response times
- Developed high-performance Go backend services using the Gin framework and GORM, architecting essential server-side functionality to provide reliable data synchronization across mobile platforms
- Eliminated high-priority system defects and bugs and implemented iterative feature enhancements throughout sprint cycles, driving measurable gains in application reliability and user experience metrics

FREELANCE
SRRV (Website) Jun 2026 - Sep 2026
Technologies: React, Next.js, Supabase, PostgreSQL

- Developed highly responsive public-facing web interfaces and the primary landing page using React and Next.js
- Architected the backend infrastructure and relational database utilizing Supabase(Postgre)
- Designed comprehensive database schemas, defining complex table structures and entity relationships
- Implemented Row Level Security (RLS) policies to enforce strict data access control and maintain database integrity
- Streamlined server-side processes and guaranteed data consistency through the strategic deployment of PostgreSQL triggers, stored procedures, and rigorous relational normalization

PROJECTS

FOOD-TRIPID (Mobile App) 2023
Technologies: Flutter, Dart, Firebase

- Engineered the complete mobile user interface and core application logic utilizing Flutter and Firebase
- Implemented secure user authentication and personalized profile management systems
- Developed social networking capabilities, including cross-user following and interactive post engagement (likes)
- Built end-to-end user-generated content features, allowing users to seamlessly create and publish posts
- Designed and integrated a robust search engine with advanced filtering parameters to optimize data discovery

EDUCATION

BICOL UNIVERSITY – MAIN CAMPUS Legazpi, Albay
BS Information Technology 2024

General Weighted Average (GWA): 1.606; Cum Laude; Dean's Lister, 2021–2024
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Web & Mobile Development
